INCIDENT RESPONSE READINESS ASSESSMENT

PUT YOUR IR PLAN TO THE TEST

Security incidents are inevitable, and the damage they cause depends on your level of preparation. To protect your business, you need to continually review and revise your incident response plan.

CBI's Incident Response Readiness Assessment identifies weaknesses in your incident response program and advances your ability to detect and respond to cyberattacks.

OUR APPROACH

CBI has been on the front lines, responding to security incidents for over 15 years. We have seen what fails and what works, and we apply this knowledge along with best practices to help your organization quickly take action and minimize damage when an incident occurs.

Our experts evaluate your incident response capabilities with viable and probable attack scenarios to identify blind spots, and provide tactical and strategic recommendations that enable you to respond to threats with confidence.

BENEFITS

- Gain insight into how your team would perform in the event of an attack
- Establish enhanced focus on probable attack scenarios such as ransomware
- Mature your incident processes, procedures, standards, and guidelines
- Decrease cyber insurance premiums
- Identify short and long-term initiatives to advance your security posture
- Learn how to prepare your company, your data, and your team for the best possible outcome

DELIVERABLES

- Key Findings Report
- Gap Analysis
- Threat Mitigation Roadmap

We are available when you need us, with the added assurance of enhanced service level agreements **between CBI and your organization**.

PROCESS

Evaluation
We review your incident response program, including team roles and responsibilities, security policy and procedures, and security controls.

Analysis
Our experts compare their findings to industry best practices and apply our own experience to identify gaps and opportunities for improving your readiness.

Hands-On Testing
We conduct exercises to evaluate how your team would respond during a security incident, test their awareness of current IR processes, and determine their ability to effectively identify and respond to an incident.

ESTIMATED DURATION

Project duration is approximately one to two weeks, dependent upon scope. Final pricing, scope, and deliverables are determined upon execution of a formal statement of work.
