PENETRATION TESTING AS A SERVICE

Now more than ever, cyber preparedness is critical to business success. Effective penetration testing enables you to find, prioritize, and remediate security threats quickly and efficiently.

Our Penetration Testing as a Service [PTaaS] is a cost-effective solution for organizations that require frequent testing. Engagement progress can be tracked in real-time as results are entered in a secure portal by CBI's Advanced Testing Services (ATS) team. The portal is a private cloud environment that meets numerous compliance standards, including ISO27001/27017/27018, SOC 1, SOC 2, SOC 3, FIPS140-2, and GDPR.

PTaaS enables you to manage vulnerabilities with world-class penetration testing execution and delivery.

DELIVERABLES

- Key Findings Report
- Gap Analysis
- Threat Mitigation Roadmap

BENEFITS

Accelerated Efforts
Begin remediation efforts as results from the engagement are documented in the portal. Receive real-time notifications when critical threats are identified.

Increased Visibility
Gain insight into your organization's vulnerabilities and identify priorities using detailed analytics, dashboards, and remediation tracking features.

Tighter Collaboration
Connect our Red Team with your business, technology, and security teams for close collaboration.

Centralized Integration
Centralize integrations via secure self service APIs, Jira products, exportable formats, etc.

Greater Cost Efficiency
Increase efficiency with tools and workflows that reduce project overhead and cut costs by up to 40%.

Whether it's scoping a new engagement, parsing real-time vulnerability reports, assisting you with remediation or helping you maintain compliance, we ensure a frictionless and simplified experience.

We are available when you need us, with the added assurance of enhanced service level agreements **between CBI and your organization.**

ADVANCED TESTING SERVICES PORTAL

Our ATS portal connects business, technology, and security teams to highlight risks and priorities, and reduce vulnerability remediation lead times. Relevant data is displayed in an executive dashboard before, during, and after a test is performed, providing real-time visibility that enables you to begin remediation efforts as notifications and results are documented by our team.

The portal is a secure, private cloud environment that meets compliance standards, including ISO27001/27017/27018, SOC 1, SOC 2, SOC 3, FIPS140-2, and GDPR.

ESTIMATED DURATION

Project duration is approximately one to two weeks, dependent upon scope. Final pricing, scope, and deliverables are determined upon execution of a formal statement of work.

CBI Services

Architecture & Integration	Managed Security	Security Programs	Security Products	
Architecture	SOC-as-a-Service	Penetration Testing	Application	Network
Integration	SIEM-as-a-Service	Ransomware Assessment	Cloud	SIEM / UEBA
• Strategic Staffing	Additional Managed Security Services	Application Testing	Data	User
• Virtual CISO		Incident Response	Endpoint	

Core Values

Core values at many companies are written once and put in a drawer to collect dust. At CBI, we discuss and live by our core values every day.

Authentic   Client-First   Blue Collar Work Ethic   Performance-Based Culture

Community

As a community-minded company, we strive to protect those around us from domestic and international cyber threats, while giving back as much as we can at every opportunity.
