

PENETRATION TESTING

FIND VULNERABILITIES BEFORE ATTACKERS DO

CBI's penetration testing services actively exploit architectural weaknesses and configuration vulnerabilities to determine how effectively your security controls perform. We have a passion for collaboration, working shoulder to shoulder with defenders and the business to understand your objectives and better evaluate your ability to detect and respond to threats. Our consultants combine automation, sophisticated manual techniques and the latest tools available to simulate attacks on your network and identify gaps. We leverage internal, commercial, community and open-source threat intelligence to test the efficacy of your security investments during a real-world attack.

Our [Penetration Testing as a Service \[PTaaS\]](#) offering is an ideal, cost-effective solution for organizations that require frequent testing. Whether it's scoping a new engagement, parsing real-time vulnerability reports, assisting you with remediation, or ensuring consistent compliance, we provide a frictionless and simplified experience through our secure ATS portal.

A Trusted Cybersecurity Solutions Provider For Over Three Decades

Each assessment is customized based on your organization's specific requirements and desired outcomes. Testing may be performed from an internal perspective, external perspective, or both.

- Network (Internal & External)
- Social Engineering
- Application
- Wireless
- Physical
- Cloud
- Red Teaming
- Purple Teaming

DELIVERABLES

- Key Findings Report
- Gap Analysis
- Threat Mitigation Roadmap

BENEFITS

Over 15 years of penetration testing experience

Over 3,000 completed assessments

Credibility with active top-secret clearances

All industry level certifications
Including OSCP/OSWE, SANs, etc.

We are available when you need us, with the added assurance of enhanced service level agreements **between CBI and your organization.**

ADVANCED TESTING SERVICES PORTAL

Our ATS portal connects business, technology, and security teams to highlight risks and priorities, and reduce vulnerability remediation lead times. Relevant data is displayed in an executive dashboard before, during, and after a test is performed, providing real-time visibility that enables you to begin remediation efforts as notifications and results are documented by our team.

The portal is a secure, private cloud environment that meets compliance standards, including ISO27001/27017/27018, SOC 1, SOC 2, SOC 3, FIPS140-2, and GDPR.

ESTIMATED DURATION

Project duration is approximately one to two weeks, dependent upon scope. Final pricing, scope, and deliverables are determined upon execution of a formal statement of work.

Core Values

Core values at many companies are written once and put in a drawer to collect dust. At CBI, we discuss and live by our core values every day.

Community

As a community-minded company, we strive to protect those around us from domestic and international cyber threats, while giving back as much as we can at every opportunity.

If you suspect an incident, contact us right away • [800.747.8585](tel:800.747.8585) • help@cbisecure.com

CBI is a leading cybersecurity advisor to many of the world's top tier organizations. Founded in 1991, CBI provides innovative, flexible, and customizable solutions to help ensure data is secure, compliant, and available. We engage in an advisory-led approach to safeguard our clients against the ever-changing threat landscape—giving them comprehensive visibility into their entire security program and helping them avoid cyber challenges before they can impact their data, business, and brand. We are dedicated to the relentless pursuit of mitigating risks and elevating corporate security for a multitude of industries and companies of all sizes.
