

# PENETRATION TESTING

FIND VULNERABILITIES BEFORE ATTACKERS DO

CBI, A Converge Company offers Penetration Testing Services to actively exploit architectural weaknesses and configuration vulnerabilities to determine how effectively your security controls perform. We have a passion for collaboration, working shoulder to shoulder with defenders and the business to understand your objectives and better evaluate your ability to detect and respond to threats. Our consultants combine automation, sophisticated manual techniques, and the latest tools to simulate attacks on your network and identify gaps. We leverage internal, commercial, community and open-source threat intelligence to test the efficacy of your security investments during a real-world attack.

Our [Penetration Testing as a Service \[PTaaS\]](#) offering is an ideal, cost-effective solution for organizations that require frequent testing. Whether it's scoping a new engagement, parsing real-time vulnerability reports, assisting you with remediation, or ensuring consistent compliance, we provide a frictionless and simplified experience through our secure ATS portal.

## A Trusted Cybersecurity Solutions Provider For Over Three Decades

Each assessment is customized based on your organization's specific requirements and desired outcomes. Testing may be performed from an internal perspective, external perspective, or both.

- Network (Internal & External)
- Social Engineering
- Application
- Wireless
- Physical
- Cloud
- Red Teaming
- Purple Teaming

## DELIVERABLES

- Key Findings Report
- Gap Analysis
- Threat Mitigation Roadmap

## BENEFITS

Over 15 years of penetration testing experience

Over 3,000 completed assessments

Credibility with active top-secret clearances

All industry level certifications  
Including OSCP/OSWE, SANs, etc.

We are available when you need us, with the added assurance of enhanced service level agreements **between CBI and your organization.**

## ADVANCED TESTING SERVICES PORTAL

Our ATS portal connects business, technology and security teams to highlight risks and priorities, and reduce vulnerability remediation lead times. Relevant data is displayed in an executive dashboard before, during and after a test is performed, providing real-time visibility that enables you to begin remediation efforts as notifications and results are documented by our team.

The portal is a secure, private cloud environment that meets compliance standards, including ISO27001/27017/27018, SOC 1, SOC 2, SOC 3, FIPS140-2, and GDPR.

## ESTIMATED DURATION

Project duration is approximately one to two weeks, dependent upon scope. Final pricing, scope, and deliverables are determined upon execution of a formal statement of work.

# CBI Services

### Security Programs

Advanced Testing  
Application  
Penetration  
Emerging Threat  
Incident Response

### Architecture & Integration

Strategic Staffing
