ARCHITECTURE INTEGRATION & MANAGEMENT

CONNECT CYBERSECURITY TO BUSINESS OUTCOMES

CISOs are increasingly held accountable for both business and technological aspects of security. As they seek to create value for the business, optimizing investments has never been more important. CBI's Architecture, Integration & Management Services are designed to align cybersecurity capabilities with desired business outcomes, and strengthen defenses across people, process, and technology.

OFFERINGS

SECURITY ARCHITECTURE

A successful cybersecurity strategy starts with the architecture. CBI's Security Architecture Services evaluate your technical security posture to identify opportunities and ensure consistent cybersecurity across on-premises, hybrid cloud, and multi-cloud environments. We use data from configurations, reference architecture diagrams, interviews, and other controls to assess your current state and provide recommendations based on industry best practices.

INTEGRATION

Cybersecurity is plagued by point-tool problems. CBI evaluates your controls to identify overlapping capabilities, reduce manual processes, and establish a strong foundation of tightly integrated solutions that aligns with security and business objectives. We help you optimize tools and consolidate vendors to form an ecosystem that decreases operational hardship, and leaves fewer security gaps.

CYBERSECURITY STAFF AUGMENTATION

Organizations are struggling to fully staff security teams. From short-term projects to long-term assignments, CBI's cybersecurity staff augmentation services help you close skills gaps and increase the efficiency of security operations. We provide a team-based approach at a fraction of traditional augmentation costs, rapidly enhancing your security program with industry experts.
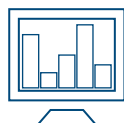

SOC-as-a-Service [SOCaaS]

Security operations teams are burning out in the effort to fend off constant cyberattacks. CBI's SOC-as-a-Service provides you with 24/7 monitoring of logs, devices, clouds, networks, and assets. Our dedicated SOC engineers combine their knowledge and skills with managed detection and response (MDR) to investigate alerts, eliminate false positives, and help you respond to threats.

BENEFITS

- Build a Security Architecture Roadmap
- Synchronize Cloud Initiatives with Strategic Business Objectives
- Streamline Your Technology Stack
- Extend Your Security Team with Industry Experts

We are available when you need us, with the added assurance of enhanced service level agreements **between CBI and your organization**.
