CISOs are increasingly held accountable for both business and technological aspects of security. As they seek to create value for the business, optimizing investments has never been more important. CBI's Architecture & Integration Services are designed to align cybersecurity capabilities with desired business outcomes, and strengthen defenses across people, process, and technology.

**ARCHITECTURE**
A successful cybersecurity strategy starts with the architecture. CBI's Security Architecture Services evaluate your technical security posture to identify opportunities for improvement and ensure consistent cybersecurity across on-premises, hybrid cloud, and multi-cloud environments.

**INTEGRATION**
Cybersecurity is plagued by point-tool problems. CBI evaluates your technology stack to measure current capabilities and scope of coverage, and facilitates the removal of redundant and underutilized tools that add cost and complexity. We help you identify opportunities for consolidation and automation to form an ecosystem that reduces gaps, decreases operational hardship, and promotes desired outcomes.

**BENEFITS**
- Build a Security Architecture Roadmap
- Synchronize Cloud Initiatives with Strategic Business Objectives
- Streamline Your Technology Stack
- Extend Your Security Team with Industry Experts

**STRATEGIC STAFFING**
Organizations are struggling to hire and retain skilled security professionals. From short-term projects to complex initiatives, we're committed to helping you staff and address your cybersecurity needs to help ensure the protection and growth of your organization. We provide a team-based approach at a fraction of traditional augmentation costs, rapidly extending your capabilities to help you close skills gaps, increase operational efficiency, and build long-term cyber resilience.

**VIRTUAL CISO [vCISO]**
Many organizations need security leadership, but are unable to justify the expense of a full-time Chief Information Security Officer [CISO]. CBI makes top-tier experts available to your organization at a fraction of the cost. Our advisory vCISO Services are tailored to your industry, environment, and engagement goals.

We are available when you need us, with the added assurance of enhanced service level agreements between CBI and your organization.

Core Values
Core values at many companies are written once and put in a drawer to collect dust. At CBI, we discuss and live by our core values every day.

A²IM Methodology
CBI's process is based on 30 years of proven approaches and solutions. We listen first, bring our decades of experience to your challenges, and ensure the solutions we deliver will work for your current and future needs.

01 Assess VISIBILITY
02 Advise STRATEGY
03 Integrate INNOVATION
04 Manage OPTIMIZATION

Prioritize Automate
