

INCIDENT RESPONSE SERVICES

MINIMIZE INCIDENT IMPACT

Response time plays a critical role in determining the severity and repercussions of a cybersecurity incident. Unfortunately, many security teams are understaffed, making rapid and effective incident response (IR) difficult. Having a trusted partner on standby can reduce your response time, minimize the impact of a breach, and help you recover faster. CBI empowers you quickly investigate incidents and remediate your environment, so you can get back to what matters most: your business.

OUR APPROACH

RETAINER

Our Incident Response Retainer is a subscription-based service that provides access to a team of trusted experts with a variety of offerings in tiered response plans. Included with a retainer is an Incident Response Readiness Assessment that enables us to develop an accurate picture of where you stand and provide actionable recommendations for improvement. Service level agreements (SLAs) include rapid response times, and unused hours can be rolled over into alternate projects or services.

RESPONSE

CBI has been on the front lines, responding to security incidents for over 15 years. We have seen what fails and what works, and we apply this knowledge along with best practices to help your organization take decisive action and minimize damage. We offer 24/7/365 support through a global emergency hotline. After an initial phone consultation, CBI experts begin working with you—on-site or remotely—within hours. As part of our efforts, we roll out key technology that promotes the effective triage, remediation, and restoration of environments.

FORENSICS

CBI supports critical digital forensic needs. We provide a physical examination of affected systems, and complete digital evidence reporting to uncover what did or did not happen. We establish a timeline of events using a combination of computer forensic expertise and traditional investigative techniques, facilitate eDiscovery collections, and help you take the necessary steps to ensure data is not destroyed.

CBI's on-demand and subscription-based IR services are designed to protect assets, mitigate risk, and facilitate compliance.

We are available when you need us, with the added assurance of enhanced service level agreements **between CBI and your organization.**
