A well-run security operations center [SOC] is at the heart of effective cyber defense. However, building an in-house SOC is a costly and time-consuming challenge. CBI's Managed Security Services provide a cost-effective alternative, extending your security team with expert analysts to detect and remediate threats before they impact your business.

OUR APPROACH

CBI's managed SOCaaS offering provides you with comprehensive 24/7 monitoring, alert enrichment, incident prioritization, and playbook-led responses for your critical security solutions. We focus on reducing risks and enabling you to respond quickly to attacks, without burdening internal resources.

We bring together hand-curated and validated threat intelligence feeds, best-of-breed technologies and experienced threat hunters to give you all the benefits of a SOC without the cost, complexity and resource investment of an internal function. Our SOCaaS team is deeply integrated with CBI’s Advanced Testing Services and Incident Response teams; we focus on continuous improvement, providing strategic guidance to help strengthen your security posture over time.

Managed Detection & Response

Organizations are struggling to operationalize data from disparate tools due to a lack of time, personnel, and training. We provide expert management of key security controls to investigate alerts and facilitate remediation.

- Endpoint Detection and Response (EDR)
- Email Security
- Data Loss Prevention (DLP)
- Next-Generation Firewall (NGFW)
- Security Information & Event Management (SIEM)

Threat Management

Sophisticated threats can bypass security controls. We conduct in-depth investigations into potential risks, mitigate threats to application programming interfaces (APIs), and identify malicious activities that have evaded detection.

- API Integration Automation
- Threat Hunting
- Threat Intelligence/
  Dark Web Monitoring
- Threat Modeling

Managed Cloud Security

Moving traditional applications to the cloud puts sensitive data at risk. CBI helps you leverage cloud services for an efficient working environment, while minimizing the potential of a data breach or compromised account.

- Amazon Web Services (AWS)
- Google Cloud
- Microsoft Azure
- Cloud Access Security Broker (CASB)
- Cloud Proxy
- Multi-Factor Authentication (MFA)

BENEFITS

- Expanded security team
- Specialized skill sets
- Actionable intelligence
- Accelerated incident response
- Lower total cost of ownership
- Enhanced compliance reporting
- Continuous posture improvement

We are available when you need us, with the added assurance of enhanced service level agreements between CBI and your organization.
